FEATURES

- » **ONE YEAR WARRANTY**
- » **TWO AA BATTERY USAGE**
- » **INFRARED LED INDICATOR**
- » **HIGH LIGHT CUTOFF**
- » **LOW BATTERY LED INDICATOR**
- » **SIMPLICITY OF USE**

These **AN/PVS-7B/D Refurbished Night Vision Goggles** feature a Gen 3, green phosphor image tube originally manufactured by one of these prior brands: ITT Night Vision, Harris, or Exelis. Each comes with a 1 year warranty and a standard accessory kit.

The AN/PVS-7B/D was one of the military issued night vision goggles for the US armed forces for many reasons; built to withstand water immersion, utilize quick connect and disconnect features, and include an infrared LED for use in complete darkness and to assist in reading maps. An LED warning light is built into the unit to remind the user that the infrared LED can be seen by others who are using night vision devices. The AN/PVS-7B/D runs on two AA batteries which power the unit for more than 40 hours. A low battery warning light is built into the unit and a high light cut-off which will turn the unit off if it is left on during daylight conditions.

For optimum performance, maximum durability, and the best possible supportability, the AN/PVS-7B/D night vision device is the best choice for law enforcement, home security, outdoorsmen, boaters, campers, wildlife studies, or predator control.
