

# UNS-SR NIGHT VISION WEAPON SIGHT

## SPECIFICATIONS

POWER SOURCE:	<b>(1) AA BATTERY</b>
BATTERY LIFE:	<b>EXCEEDS 24 HRS</b>
MOUNT:	<b>KAC MOUNT OR QUICK ATTACH/DETACH TO MIL-STD-1913 RAIL OR EQUIVALENT</b>
FOCUS RANGE:	<b>20 METERS TO INFINITY</b>
RECOG. RANGE:	<b>450 M (HUMAN, 1/4 MOON)</b>
MAGNIFICATION:	<b>UNITY</b>
BORE SIGHT:	<b>WITHIN .5 MOA</b>
WATERPROOF:	<b>3 FT. FOR 4 HRS</b>

FINISH:	<b>BLACK MATTE, CORROSION RESISTANT</b>
CONTROLS:	<b>ON/OFF &amp; DISPLAY BRIGHTNESS CONTROL KNOB</b>
WEIGHT:	<b>20 OZ. (.57 KG)</b>
SIZE:	<b>5.6" (142 MM) LONG 2.7" (75MM) HEIGHT 1.4" (36MM) TO OPTICAL CENTERLINE</b>

## FEATURES

- » **1 YEAR WARRANTY**
- » **MAGNIFICATION UP TO 4X**
- » **SINGLE AA BATTERY USAGE**
- » **CLIP-ON NIGHT VISION SCOPE**
- » **QUICK ATTACH/DETACH MOUNT**

NVD is pleased to announce the LIMITED AVAILABILITY of the Knights Armament SR Night Vision Clip On Weapon sight. Manufactured by one of the world's premier weapons manufacturers, the Knights SR (Short Range) Clip On, was exclusively designed for night time engagements under 500 yards. Its light weight and short length make it the optimal back pack accessory for mid-sized AR type platforms with limited available rails and a front sight.

The SR is ideal for platforms with dedicated short range optics such as the Trijicon ACOG series and most 8X or less tactical day scopes and is short enough to fit in between your ACOG and a dedicated front sight. The UNS SR is universal and fits most fielded rifles and day scopes by attaching to the picatinny rail. Using the latest high-performance GEN 3 intensifier tube in a proven design, where the refractive lens provides high performance light collection in a lightweight design. The Knight Vision patented technology assures the accuracy of your range-tested day scope boresight will not be degraded. When the UNS SR is added in front, your existing optic, eye relief, and cheek weld are undisturbed. The UNS SR is designed for close quarter battle weapons such as the M4, M16, M14, SR25 and similarly configured battle rifles.

Replaced by the UNS-A3, these are the last SRs which will ever be built by Knights and these will have a limited distribution of only 200 systems. These units are being manufactured with Gen III Elbit or L3 Green Phosphor, Min 1600 FOM Image Tubes and these systems include a full one year warranty.

Don't miss this opportunity as these will not last long.

## STANDARD ACCESSORIES

Operator's Manual, Soft Case, (1) AA Battery, Light Shroud and Lens Cleaning Kit.
