

# SKULL LOCK<sup>™</sup> LITE HEAD MOUNT

NVG SOFT HEAD HARNESS

## PRODUCT OVERVIEW

The Wilcox line of Head Mounts offers the versatility of a helmet mounting solution without the added weight of a ballistic helmet. The Wilcox Skull Lock Lite Head Mount is lightweight, low-profile, and lo-vis comprised primarily of fabric, lending comfort and versatility to usage and storage. A padded hook and loop cap design allows attachment of patches and strobes and also utilizes a removable battery pouch that stores a battery pack or counterweight system for NVG weight distribution. The CAM FIT<sup>™</sup> retention system utilizes Cam Lock sliders for one-handed adjustment and is completely adjustable for a secure fit with the turn of the BOA<sup>®</sup> dial. When not in use, the system can easily be folded and placed into a cargo pocket or pack.

## MOUNT COMPATIBILITY

– Compatible with the full line of Wilcox L4 series NVG mounts

*\*AERONOX, DPAM, and GSGM mounts require an interface plate adapter (sold separately).*

## SPECIFICATIONS

Weight: 206.95 g (7.3 oz)  
Sizing: Small - 7.25" or less
