

AN/PVS-14 SHOE/ARM

PRODUCT OVERVIEW

The Wilcox AN/PVS-14 Shoe/Arm provides a durable connection for mounting an AN/PVS-14 goggle to Wilcox helmet mounting solutions. It can be easily mounted and dismantled from the AN/PVS-14 goggle by means of an Attachment Knob that allows the Operator to make fine adjustments to the arm locating the night vision goggle in its optimal position.

FEATURES AND BENEFITS

- Durable connection for mounting an AN/PVS-14 goggle
- Can be used with the Wilcox NVG Lanyard for secure attachment to an array of NVG devices preventing loss of the NVG and breakaway of the Wilcox Universal NVG Mount from the helmet mount base
- Each mechanical adjuster is durable and ergonomically positioned for easy one-handed operation while handling a weapon
- Maintains a very low profile stance on the helmet
- Designed for optimal ocular positioning
