

G11[™]
NON-BREAKAWAY HORN INTERFACE

U.S. ARMY
PROGRAM OF RECORD

PRODUCT OVERVIEW

The G11 is a non-breakaway mount with a horn interface shoe. The G11 is the industry standard for NVG mounting. The G11, when attached to a Wilcox One-Hole Shroud, Three-Hole Shroud, or the standard Army shroud, allows firm attachment of the bayonet/horn style interfaces like that of the AN/PVS-7B/D. The G11 maintains a very low-profile stance on the helmet with a non-breakaway design the reduces the risk of the loss of the NVG.

FEATURES AND BENEFITS

- Each mechanical adjustment is durable and ergonomically positioned for easy one-handed operation while handling a weapon
- Stow mechanism provides “force to overcome” locking in the operational and stowed positions
- A built-in auto-off feature allows the goggle to automatically turn off when stowed for NVG devices
- Several adjustment points provide precise eye relief
- 5 Year Standard Limited Warranty

SPECIFICATIONS

Dimensions:	11.8 cm L x 6.6 cm W x 9.7 cm H (4.65" L x 2.58" W x 3.80" H)
Weight:	181 g (6.4 oz)
Material Construction:	Lightweight, Aerospace Grade Metal
Accommodates NVG:	AN/PVS-7B/D
Vertical Height Adjustment:	0.90"
Fore/Aft Travel:	<1.6"
Tilt to Horizon:	12° Above to 5° Below, 17° Total Travel
Flip:	110°

Available Colors: ■-B
